

SUBLIMATED FX Team Wear

Engineered To Perform

Caring for your Sublimated FX Garment.

WASHING INSTRUCTIONS

Machine Wash,
COLD
Gentle Cycle

Hand
Wash

Wash using cold or warm water with a mild laundry soap (ecological, biodegradable types preferred) and drying on the line is the best way to clean and maintain a Sublimated FX product.

To remove stains, dirt or grease from your garment, dampen the stain and rub in dishwashing detergent or a safe pre-treatment cleaning fluid (no bleach, if in doubt test a small corner inside) both of which you can find at your local supermarket. Then hand wash the garment in warm water with plenty of mild laundry soap. To remove chewing gum or tree sap from your garment, first freeze the affected area with some ice, then use a dull butter knife to scrape off as much as you can. Next, soak the garment in a water/white-vinegar solution, and throw it into the laundry with warm water and detergent.

DRYING / TUMBLE DRYING INSTRUCTIONS

Tumble Dry,
NO HEAT

Tumble Dry,
LOW HEAT

Line Dry

Drip Dry

As there are many types of Sublimated FX garments, our general recommendation from an environmental stand-point and a wash-care stand-point is to dry all of them on a line. Our products dry quickly.

Do NOT put them into a dryer.

We use heat when manufacturing, heat will undo all our work. The print will start to "bleed" one colour into another. This is heat damage. Any temperature above 130 deg C applied for more than 15 seconds will cause the ink to begin the sublimation process again.

Iron with a cool iron. Our factory irons are set on 2 and we use a pressing cloth to prevent mistakes.

Sublimated FX accepts no responsibility for any damage caused by the use of any appliance that creates and applies heat, be it a clothes dryer, an iron or any other appliance using excessive heat and is outside of our direct control.

AVOID ABRASIVES like VELCRO

Avoid Contact with
Abrasive Surfaces

Due to the highly technical and specialised requirements to manufacture moisture management fabric, you will need to be a little more aware of rough or abrasive surfaces.

These specially made synthetic fabrics use delicate man made fibers to be able to "breathe". Contact with abrasive surfaces can result in "pilling," runs and 'pulls' in the fabric. Velcro, common to many rucksacks, gym bags, shoes (and even some of our garments) should be avoided where possible, particularly the lighter and thinner fabrics.

Do not wash any your Sublimated FX product at the same time

WARNING : FLAMMABLE

Warning! Synthetic
Fabric are Flammable

The fabrics we use will melt or burn if exposed to flame or direct heat.

Do not use them near ANY direct source of heat or flame.

IRONING

Iron or Dry
with **LOW HEAT**

Do Not Iron
with Steam

Sublimated FX does not recommend ironing any of our performance garments. If ironing is required, we advise that the garment be ironed inside-out to avoid contact between the surface of the iron and any customisation (printing, numbering, etc) of any kind that has been applied.

DRY-CLEANING

Do **NOT** Dryclean

DO NOT DRY CLEAN any of your Sublimated FX products. It will be RUINED.

Sublimated FX accepts no responsibility for any damage caused by the use of a dryer on any of our products.

REGARDING BLEACH AND FABRIC SOFTENER

Do Not Bleach
No bleach products should be used
including detergents with bleach

Some moisture management fabrics use a chemical coating to help break down the surface tension and dry the fabric quickly. This does not last. Washing loosens the chemical coating and in a short time the fabric cannot dry and the print fades. I get this complaint a lot.

Sublimated FX fabric is manufactured from the ground level up to be a moisture management fabric. We do however recommend not using fabric softener on our products. The softening chemicals apply a coating to the fabric to cause it to soften, it may significantly diminish the moisture management performance, but the colour will not fade.

DO NOT USE BLEACH!

Sublimated FX accepts no responsibility for any garment damage caused by the use of BLEACH on any of our products.
